*Telephone* : 1-888-771-8321

## OBJECTIVE OF THE *FEASIBILITY STUDY PROGRAM*

Before undertaking the construction or expansion of a building, Gazifère recommends that you carry out a feasibility study to identify the measures that will achieve genuine improvement in the energy performance of the building.

As an incentive, Gazifère offers financial assistance of \$2,000 to cover a portion of the cost of having an energy simulation carried out, using a simulation tool such as EE4, Canquest or DOE2. The offer is valid until December 31, 2014. All applications received before that date will be processed by Gazifère.

### **Eligible customers**

The program is intended for Gazifère's future commercial and institutional customers. In order to qualify for financial assistance from Gazifère, the building must use natural gas as its main source of heat.

### **Eligibility criteria**

In order to obtain the financial assistance offered by Gazifère, the following criteria must be met.

In general, the energy simulation for the building should:

- improve the energy efficiency of the new building by at least 25%, as compared with the standards of the National Energy Code of Canada for Buildings;
- exclude all measures designed to replace natural gas with another energy source; and
- distinguish the energy savings generated by appliances that qualify for financial assistance under a separate Gazifère program, in order to avoid double counting

## Procedure

In order to obtain financial assistance from Gazifère, you should submit the following documents before construction begins:

- Application form – *Feasibility study – New building*;
- Relevant simulation data (on CD).

**These can be forwarded to us by mail at the following address:**

Gazifère ATT : Energy Efficiency Programs 706, boulevard Gréber, Gatineau (Québec) J8V 3P8

Upon receipt of the documents, Gazifère will submit the information to an experienced energy modelling specialist. The cost of having the report reviewed will be borne entirely by Gazifère, and a copy of the review report will be forwarded to the customer. Gazifère will analyse the report before approving financial assistance.
