

SUMMARY OF MEASURES IMPLEMENTED

Support for Initiatives – Energy Optimization and Implementation Assistance components

Description of the measure	Useful Life	Final Proposed Use ¹	Annual Consumption Under the Reference Scenario (m ³)	Annual Consumption Under the Efficiency Scenario (m ³)	Projected Annual Natural Gas Savings (m ³)	Annual Savings (\$)	Cost of the Efficiency Scenario Compared to the Reference Scenario ² (\$)	Annual ROI

Price of natural gas³
Average for the past 12 months: _____ \$/m³

Name of the company: _____

Date : _____

Name of the contact in the company: _____

Gazifère account number: _____

Title : _____

¹ Specify the projected final use per measure: procedure, space heating etc.

² Acquisition, installation, removal, etc.

³ Unit cost of natural gas before taxes based on the average for the 12 months prior to the pre-admission application (must include : distribution, transportation, gas supply, cost adjustment and purchase of carbon emission allowances).
